

Mykell McSwain

Software Developer

239-980-6046 | kaishiguiofficial@gmail.com | github.com/kaishigui | linkedin.com/in/kaishigui

Summary

Creative problem-solver. Technical skills developed through project-based experience. Looking to grow my skills and knowledge of **JavaScript** and **React** as a web developer.

Experience

Project 1

github.com/kaishigui/spotify.git

Spotify Clone

- Built a Front-End React Application using React, Redux, Nodejs and Spotify API.
- Involved authentication and a user interface using Google Firebase to create unique playlists.
- Created a responsive layout and music player using CSS tools such as Flexbox, Material-UI

Project 2

github.com/kaishigui/netflix-clone.git

Netflix Clone

- Built a Responsive React Application using React, Redux, Nodejs and Netflix API.
- Implemented use of Axios, Async, ES7, and React-Router to aid in construction of application.
- Implemented creative CSS skills to create responsive movie banners with detailed descriptions.

Project 3

github.com/kaishigui/sanity-yt-demo.git

Medium Clone

- Built a responsive Nextjs application using React, Tailwind, Sanity, and Nodejs
- Involved a custom API and a user interface using Sanity to create blog posts and comments
- Implemented Tailwind skills to create a responsive, modern web design for desktop and mobile.
- Responsible for integrating third-party react libraries and handling Server-Side-Rendering.

Education

Florida Gulf Coast University

Majoring in Software Engineering.

- Web Developer of the Eagle E-Sports Organization
- Head of Web Design Department of Eagle Nest Game Design
